

UI / UX THEME RECALIBRATION — DEVELOPMENT DELIVERABLE
Version 1.1 | Prepared August 14, 2026 | WORKING UI/UX SPECIFICATION

No matter what journey you begin... Start With GEMS

1. Purpose Of This Page

Educational Journey is the dedicated pathway for students and prospective students using GEMS. Its purpose is not simply to present a list of services. It should show the visitor that GEMS can remain useful throughout the entire educational journey — before arrival, after arrival, while studying, and after graduation.

2. Role Within The StartWithGEMS Experience

- Home → Educational Journey: the visitor identifies education as their current journey.
- Educational Journey → the visitor can immediately recognize where they are in that journey.
- Each stage presents practical areas where GEMS can provide guidance, information, planning, or trusted connections.
- The page naturally leads to Onboarding GEMS, Membership Levels, Trusted Network, and Resources.
- The experience should make GEMS feel like a continuing companion rather than a one-time service provider.

3. GLOBAL BRAND TREATMENT

Required page tagline	No matter what journey you begin... Start With GEMS
Central GEMS philosophy	Trust is our product. Guidance is our service. Connections are our strength.
Relationship positioning	GEMS is a trusted traveling companion — walking alongside the visitor throughout the journey.
Tone	Warm, reassuring, expert, authoritative, human.
Page principle	One journey. Clear stages. Practical guidance. Trusted connections.

4. HERO — EDUCATIONAL JOURNEY

Background / Visual Direction

- Use cinematic but authentic imagery showing students progressing through different stages of life — arriving, studying, building a life, and moving toward a career.
- People shown should feel relatable to the intended visitor.
- Avoid imagery suggesting GEMS is only an admissions or recruiting company.
- Use a subtle dark/brand overlay for readability.
- Communicate movement, belonging, confidence, and continuity.

Hero Content

- **Eyebrow:** EDUCATIONAL JOURNEY
- **Headline:** Your educational journey is more than getting into a school.
- **Supporting message:** From choosing where to begin to building your life after graduation, GEMS helps you navigate the decisions, challenges, and connections that shape the journey.
- **Required tagline:** No matter what journey you begin... Start With GEMS
- **Primary CTA:** Start Your Educational Journey →
- **Secondary CTA:** Explore Membership →

5. THE EDUCATIONAL JOURNEY — STUDENTS

Organize the page around the actual life cycle of a student's journey. The visitor should be able to look at the four stages and immediately recognize: "That is where I am."

BEFORE YOU ARRIVE

The journey begins before the plane lands. GEMS helps students prepare with greater clarity and fewer surprises.

- School selection
- Financial planning
- Visa preparation
- Travel planning
- What to expect

CTA: Before I arrive, help me prepare → Create the buttons and i will provide the links for these

AFTER YOU ARRIVE

The first days and months in a new country can be overwhelming. GEMS helps students navigate the practical realities of settling in.

- Banking
- SIM cards
- Housing
- Transportation
- Insurance
- Driver's license guidance
- Building credit
- Employment readiness
- Safety awareness

CTA: Help me settle in → Create the buttons and i will provide the links for these

WHILE YOU STUDY

The journey does not stop once classes begin. GEMS remains relevant as students build experience, relationships, skills, and their future.

- Internships
- Career planning
- Networking
- Taxes
- Travel
- Certifications
- Professional development

CTA: Help me move forward → Create the buttons and i will provide the links for these

AFTER GRADUATION

Graduation is not the end of the journey. It is the beginning of another chapter. GEMS can continue to provide guidance and connections as the student's goals evolve.

- Career transition
- Relocation
- Further education
- Entrepreneurship
- Long-term planning

CTA: Plan what's next → Create the buttons and i will provide the links for these

6. VISUAL PRESENTATION OF THE FOUR STAGES

Recommended layout: a horizontal journey/timeline on desktop and a vertically

stacked journey on mobile. • Stage 1 → Before You Arrive

• Stage 2 → After You Arrive

• Stage 3 → While You Study

• Stage 4 → After Graduation

• Each stage should visually connect to the next so the page itself communicates continuity.

• **Avoid four unrelated service boxes. The design should make the stages**

feel like chapters of one journey.

7. THE GEMS ROLE — WHAT WE DO

Headline: You don't have to know everything before you begin.

One of the hardest parts of a new journey is knowing what you don't know. GEMS helps you identify the questions, understand the options, plan the next step, and connect with trusted people when specialized help is needed.

GUIDANCE

Help make unfamiliar decisions easier to understand.

PLANNING

Help organize the next steps, timing, priorities, and practical considerations.

CONNECTIONS

Connect students with trusted network providers when specialized services are required.

ONGOING SUPPORT

Remain available as the student's needs change from one stage of the journey to the next.

Important positioning: GEMS may provide certain consulting and guidance services directly while connecting users to qualified third-party providers for specialized services. The page should never imply that GEMS itself performs every service listed.

8. MEMBERSHIP — THE COMPANION MODEL

Headline: How closely would you like GEMS to travel with you?

Some students need a question answered. Others want someone they can return to throughout the journey. GEMS membership is designed to provide that continuing relationship.

- **Explorer** — a starting point for discovering GEMS and available resources.
- **Companion** — for students who want more personalized guidance and support.
- **Navigator** — for students who want a deeper level of ongoing assistance.

CTA: Compare Memberships →

9. TRUSTED NETWORK CONNECTION

Headline: When you need more than guidance, we help you find the right connection.

Some needs are best handled by specialists. GEMS brings trusted service providers and organizations into the journey so students do not have to navigate an unfamiliar system alone.

CTA: Explore the Trusted Network →

10. FINAL INVITATION

Background: Hopeful, cinematic image showing a student moving confidently toward the next chapter.

Headline: Your journey doesn't end at graduation.

Supporting message: Wherever you are today — preparing to arrive, settling in, studying, or planning what comes next — GEMS is here to help you move forward with greater clarity and confidence.

Tagline: No matter what journey you begin... Start With GEMS

Primary CTA: Start With GEMS →

Secondary: Explore Membership →

11. Global Footer — Standard Template

- Use the approved global footer treatment.
- Include primary navigation, journey links, Membership Levels, Trusted Network, Resources, About GEMS, Contact GEMS, Privacy Policy, and Terms of Use.
- Include GEMS branding and the required tagline where the standard footer design permits.
- Do not create a unique footer for this page.

12. Responsive / Accessibility Notes

- The four journey stages must remain easy to understand on mobile.
- Stack the stages vertically on mobile rather than forcing a tiny horizontal timeline.
- Maintain clear hierarchy between stage title, description, services, and CTA.
- Maintain sufficient contrast between text and photographic backgrounds.
- Buttons need clear tap targets and visible focus states.
- Avoid autoplay audio and respect reduced-motion preferences.
- The page must remain understandable if animation or video is disabled.

13. Development Boundaries — Webglobalmedia

- Keep the existing engine. This is a UI/UX theme recalibration, not a platform re-engineering project.
- Reuse existing technology, database structures, authentication, routing, and business logic wherever possible.
- Do not create a new backend architecture solely for this page.
- Use existing content/component mechanisms where available.
- Build the four journey stages as modular UI sections so the business can revise individual service items without redesigning the entire page.
- Preserve existing functionality unless a specific UI/UX change requires adjustment.

14. Business Decision Placeholders

- Confirm which listed services are delivered directly by GEMS versus through Trusted Network providers.
- Confirm the exact scope and wording of visa preparation/guidance.
- Confirm whether taxes are informational guidance, referral support, or a direct GEMS service.
- Confirm precise membership entitlements for Explorer, Companion, and Navigator.
- Confirm public versus member-only Trusted Network visibility.
- Confirm final destinations for each stage CTA.

15. The Strategic Result

This structure changes the perception of GEMS from a company that sells a collection of services into a platform that understands the visitor's journey.

A student may first arrive because they need help choosing a school. But the page immediately shows them that GEMS can remain relevant after they arrive, while they study, and after they graduate.

The visitor should leave understanding: “GEMS is not just helping me with something today. GEMS can be a trusted companion throughout my journey.”

16. Ui/Ux Design Principles (Developer Notes)

- Keep the engine. Change the skin. Improve the experience.
- One page. One purpose. One clear experience.
- The visitor should recognize themselves before they are asked to understand GEMS.
- Design the page as a journey, not a service catalog.
- The four stages must feel connected and progressive.
- Make the visitor's current stage immediately identifiable.
- Use cinematic imagery intentionally and authentically.
- Trust should be demonstrated through clarity, consistency, restraint, and curated connections. • GEMS is a trusted traveling companion, not the decision-maker.
- Clearly distinguish direct GEMS guidance from services delivered by Trusted Network providers. • Membership should feel like an invitation to deeper support, not a pressure-driven sale.
- Keep interactions simple, accessible, responsive, and purposeful.
- Preserve existing architecture and functionality.
- No unnecessary technology, database, framework, or backend changes.
